AI tools for Final CUT PRO/CapCut & Adobe Premiere

PREPARADO PARA EL FESTIVAL PONTE LOS CORTOS

AI tools for Final CUT PRO

- **TimeBolt**
  TimeBolt is an AI tool that can automatically clean up and edit audio in video clips, removing pauses and silences. It generates an XML file that can be imported directly into Final Cut Pro to apply the edits.

- **Audio Analysis**
  Final Cut Pro has an audio analysis feature that can automatically detect and fix audio issues in your clips. It can normalize audio levels, remove noise, and more.

- **Color Balancing**
  Final Cut Pro's color balancing feature uses AI to analyze the lightest and darkest areas of a clip and remove any color casts.

- **Object Tracking**
  Final Cut Pro has an AI-powered object tracking feature that can automatically track and stabilize the movement of subjects in a clip.

- **Smart Conform**
  When converting a 16:9 video to a vertical or square format, Final Cut Pro's smart conform feature uses AI to intelligently reframe the shots to keep the main action centered.

- **Enhance Light and Color**
  A new AI feature in Final Cut Pro 10.8 allows you to automatically improve color, balance, contrast, and brightness in one step.

- **Smooth Slo-Mo**
  Also new in Final Cut Pro 10.8, the Smooth Slo-Mo feature uses AI to intelligently generate and blend additional frames to create higher quality slow motion.The search results indicate that Final Cut Pro is increasingly integrating AI-powered tools to streamline and accelerate common video editing tasks. These features can save editors significant time and effort.

AI tools for Final Cap Cut

- **Background Removal**
  Accurately remove the background of portrait videos and replace it with an uploaded image or change the background color.

- **Auto Reframe**
  Change the aspect ratio of videos and add color, images, or blur effects to the background to meet the needs of various platforms. Auto reframe will be available soon.

- **Auto Captions**
  Automatically generate high-accuracy captions in different languages to boost editing efficiency4

- **Text-to-Speech**
  Convert any text to natural-sounding speech with one click. 11 voices and 10 languages are supported.

- **Script Generation**
  Generate a script from a prompt, then let CapCut create a video with voiceover based on the script

- **Filler Word Removal**
  Identify filler words and pauses in audio to help clean up recordings

- **AI Sticker Generator**
  Easily create AI-generated stickers.AI Avatar Generator Create stunning AI-generated avatars.

- **AI Clip Maker**
  Transform long videos into short, viral-ready clips.The search results highlight CapCut's wide array of AI-powered tools that can streamline various video editing tasks, from background removal to script generation to caption creation. These features can significantly boost productivity for video creators.

AI tools for Adobe Premiere

- **Object Addition & Removal**
  Allows users to manipulate video content by adding, removing, or replacing objects within their footage in seconds.

- **Generative Extend**
  Enables users to extend the length of clips by holding the end of a shot for a few extra seconds, ensuring smoother transitions.

- **Remix**
  Simplifies extending repeating stanzas in music cues and provides a quick way to extend notes to create ringouts.

- **Morph Cut**
  Stitches together jump cuts in interviews by removing "ums", "uhhs" and long pauses, as long as the A and B frames are relatively similar.

- **Scene Edit Detection**
  Automatically breaks up long videos, like B-roll stringouts, into individual clips, with options to create edits, add subclips to a bin, and add markers at scene changes.

- **Enhance Speech**
  Denoises and EQs dialog with one click to improve the production value of poorly recorded audio

- **Speech to Text and Text-Based Editing**
  Provides automatic transcription and text-based editing to make editing long interviews quicker and easier to navigate.

- **Auto Reframe Sequence**
  Automatically reframes a sequence to a different aspect ratio while keeping the main action centered

- **Auto Transcribe**
  Generates automatic transcripts of audio in videos. The search results highlight how Premiere Pro is integrating an expanding suite of AI-powered tools to streamline common video editing tasks. These features can save significant time and effort for editors.
